

Olympia Year 5 - Summer

History

Children will be learning about the history of Ancient Greek Olympics and the modern Olympics in 1896. We will be exploring the athletes that attended and competed at them.

ART and DT

We will be designing our own Olympic torches using a variety of different materials. We will also be creating packaging of our own Olympic product.

Drama

We will be reenacting scenes of the hoplite races using armor that the children will have created. Amongst other drama related activities.

Olympia Topic Web

We will be using the ancient and modern Olympics to inspire and develop children's work. Through written and practical lessons children will undertake different tasks that aid in their understanding of Olympic related media and help progress their learning.

Science

Children will be undertaking experiments that test chemicals and materials, in order to show how the different types of materials used affect how Olympic equipment is made.

Geography

Children will be looking at how geography affects the modern and ancient Olympics. We will be researching how different athletes from different countries have unique ways of training due to the climates they are from.

We will also be exploring how land masses are formed and how this has created mountains and land formations.
